NOTICE TO HOMEOWNER

- We recommend that this product is installed by a qualified professional plumber.
- Please check this product immediately to ensure that it has not been damaged and is complete. Before installation, please make sure this product is the correct model and you have all the parts required for installation and use.
- Please flush the water system to ensure that no metal swarf, solder, and other impurities can enter the product.
- Turn off water supply before commencing work.
- Please read these instructions carefully and retain for future reference.

OPERATING SPECIFICATIONS

WATER TEMPERATURE

This product is to be used with water at a temperature range of 40°F - 120°F ONLY!

WATER PRESSURE

This product is to be used with a water pressure range of 15 PSI to 80 PSI ONLY

If water pressure is greater than 80 PSI install a pressure reducing valve (PRV)

This valve meets or exceeds ANSI A112.18.1 and ASSE 1016

This valve is certified by IAPMO

CUT OUT DIMENSIONS

Isenberg's TVH Series valves comes with a black pre-attached mud-guard. This mud-guard is not to be removed or discarded. Its purpose is to guide the installation professional on the proper cut-out dimensions of the drywall.

Wall Cut Out Dimensions From **Center Point** of Valve:

X = 200.5 mm / 7.89"

Y = 48 mm / 1.89"

Shown Here: Vertical Installation.

Horizontal Installation also possible.

ROUGH IN SPECIFICATION

The distance between back of the valve to the finished tile surface should be between 2.40" and 3.67" inches.

Finished tile should fall between Min & Max.

If valve is installed too deep into the wall, extensions are available.

CONNECTING THE SUPPLY & OUTPUT LINES

Fix Valve on wooden plank

Level Valve

Attach Hot/Cold Lines

CONNECTING THE SUPPLY & OUTPUT LINES

THREE OUTPUT CONFIGURATION

VALVE: TVH.2705F

Connect the three output supply lines as seen on the left.

FINISHED TILE POSITION

Install Drywall and Tile. Ensure finished tile surface is between the min and max marks on the mud guards.

TRIM MARKINGS / WATER OUTPUT

The below diagram shows the markings on the trim plate and the outputs on the valve. this will help the installation professional to connect the appropriate accessories to the valve output ports.

USING THE SUPPLY STOPS

Turn Clock-wise 5 times to stop water flow.
[Three output valve version shower here]

In order to clear dirt in the lines -
you must flush the valve before the
wall is closed and water is turned on
for the first time.

- 1) Remove the 2 supply stops by
turning with a spanner
- 2) Remove thermostatic cartridge
by turning with a spanner
- 3) Turn on water supply and let
water flow removing any dirt in the
lines.

FLUSHING THE VALVE
